

# NewtonWorks eSeal Awarded “Most Innovative Product” At Gasket & Seals Show

**[Tokyo, Japan, 20 March 2025]** – NewtonWorks Corporation is proud to announce that [NewtonSuite eSeal](#), an easy-to-use tool designed to revolutionise rubber seal and weather strip analysis, has been awarded “Most Innovative Product” at the Gasket & Seals Show in Amsterdam.

eSeal is only one out of five products recognised for its excellence during the award ceremony on Wednesday evening, the 19th of March. It’s a formidable achievement, recognising our technological contributions to the industry.

NewtonWorks is dedicated to customer-led software creation, designing products with our partners and tailoring its development to the needs of the market. As an established corporation based in Tokyo, we’ve been committed to revolutionising product-level simulation tools for CAE for over 25 years.

eSeal’s [arrival to the European market](#) is further humbled with this award at the Gasket & Seals Show. **Naomichi Taketa, Account Manager at NewtonWorks Corporation**, shares,

*“Innovation and customer-led software development continue to be core values of product creation at NewtonWorks. Our team is honoured that eSeal has been recognised for its comprehensiveness and forward-thinking design, specifically designed for the needs of design engineers. We’re excited to see how eSeal develops in the European market moving forward.”*

NewtonSuite eSeal was unveiled at The Gasket & Seals Show in Amsterdam at the end of March 2025. **Visit the website for more information about eSeal, or [download informational materials](#).**

## About NewtonWorks Corporation

[NewtonWorks Corporation](#) delivers world-class CAE software solutions through strategic partnerships with top developers. With extensive expertise in 1DCAE and 3DCAE technologies, NewtonWorks supports manufacturing clients in building optimal systems for their business, from initial concept to final production.
